

Warm Greetings!

Dear Students,

In this note, we are going to discuss about

Chapter 5:Creating Webpage Using HTML

Formatting Text:

You already know about formatting. You can also use formatting in HTML using tag with the different attributes.

Changing Font :

You must choose the font of your text to be displayed carefully. While choosing font, you have to consider the availability of the same font type in the computer where other users view the webpage.

To change the font, do the following:

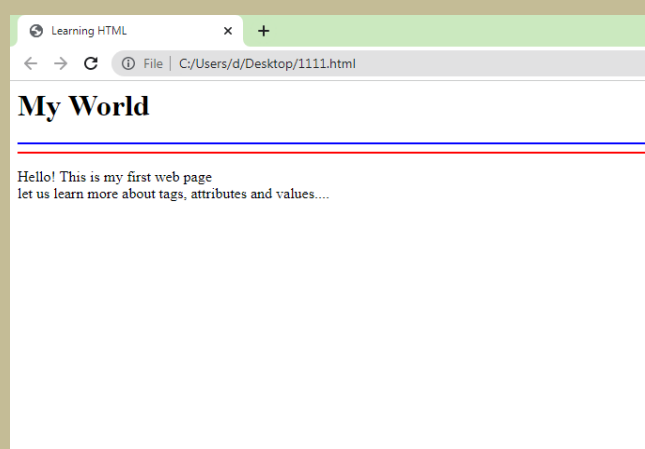

- 1.Type the tag with the attribute FACE as

For example:

- 2.Type the text.

- 3.Type the closing tag.

```
1111 - Notepad
File Edit Format View Help
<HTML>
<HEAD>
<TITLE> Learning HTML</TITLE>
</HEAD>
<BODY>
<H1> My World</h1>
<HR color=Blue>
<HR color=Red>
<P>Hello! This is my first web page<br>
let us learn more about tags, attributes and values....</P>
<Font face="Monotype corsiva"> </Font><br>
</body>
</html>
```

Changing Font size :

Font size is used to change the height and width of the character.

To change the font size, do the following:

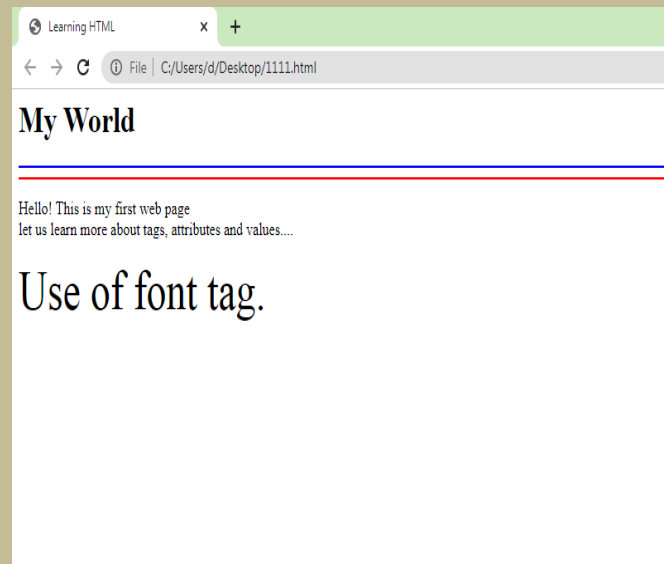

1.Type the tag with the attribute SIZE as where n is the value of the font.

For example:

2.Type the text.

3.Type the closing tag.

```
1111 - Notepad
File Edit Format View Help
<HTML>
<HEAD>
<TITLE> Learning HTML</TITLE>
</HEAD>
<BODY>
<H1> My World</h1>
<HR color=Blue>
<HR color=Red>
<P>Hello! This is my first web page<br>
let us learn more about tags, attributes and values....</P>
<Font size=16>Use of font tag. </Font><br>
</body>
</html>
```

Changing Font Colour:

Font color is used to change the colour of the text. You can even change the colour of individual characters.

To change the font colour, do the following:

1.Type the tag with the attribute Color as

For example:

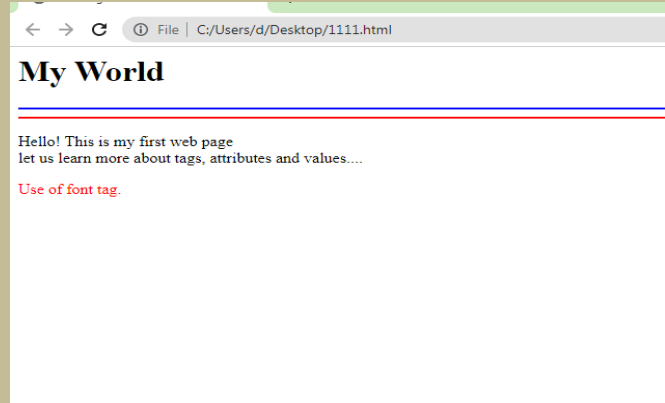

2.Type the text.

3.Type the closing tag

```
1111 - Notepad
File Edit Format View Help

<HTML>
<HEAD>
<TITLE> Learning HTML</TITLE>
</HEAD>
<BODY>
<H1> My World</h1>
<HR color=Blue>
<HR color=Red>
<P>Hello! This is my first web page<br>
let us learn more about tags, attributes and values....</P>
<Font color="red">Use of font tag. </Font><br>
</body>
</html>
```

Changing Font Style:

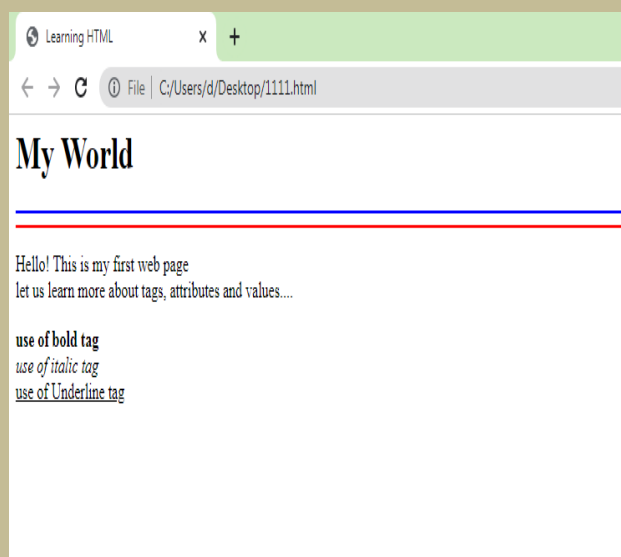

Bold, Italic and Underline are the formatting styles that can be applied to a text. To make the text bold, italic and underline, do the following:

- | | |
|------------------------------|------------------------------|
| 1. Type the tag. | 1. Type the tag<I>. |
| 2. Type the text. | 2. Type the text. |
| 3. Type the closing tag. | 3. Type the closing tag</I>. |

1. Type the tag<U>
2. Type the text.
3. Type the closing tag</U>

```
1111 - Notepad
File Edit Format View Help

<HTML>
<HEAD>
<TITLE> Learning HTML</TITLE>
</HEAD>
<BODY>
<H1> My World</h1>
<HR color=Blue>
<HR color=Red>
<P>Hello! This is my first web page<br>
let us learn more about tags, attributes and values....</P>
<B> use of bold tag</B> <br>
<I> use of italic tag </I> <br>
<U> use of Underline tag </U> <br>
</body>
</html>
```

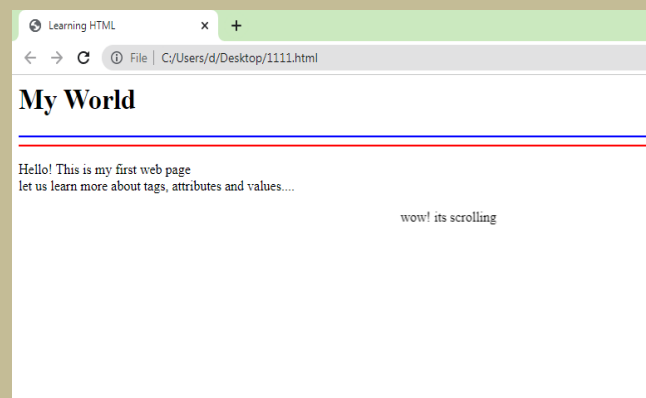

MARQUEE TEXT:

A **marquee** displays a scrolling text message. You can place moving or scrolling text in your webpage using **<MARQUEE>** tag.

- 1.Type the tag **<MARQUEE>**.
- 2.Type the text.
- 3.Type the closing tag **</MARQUEE>**

```
<HTML>
<HEAD>
<TITLE> Learning HTML</TITLE>
</HEAD>
<BODY>
<H1> My World</h1>
<HR color=Blue>
<HR color=Red>
<P>Hello! This is my first web page<br>
let us learn more about tags, attributes and values....</P>
<Marquee> wow! its scrolling</marquee>
</body>
</html>
```

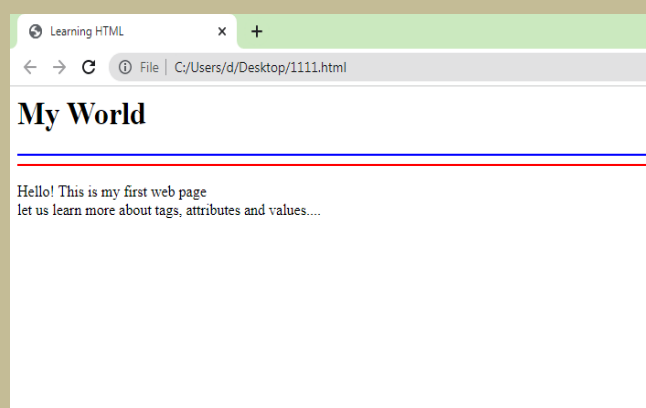

ADDING COMMENTS:

Comments are very useful while writing programs. Comments are like notes. You can add comments in your webpage. Comments are not visible in the browser window.

To add comments, do the following:

- 1.Type the symbol! Within the opening angular bracket as **<!**.
2. Type the comment.
- 3.Type the closing angular bracket as **>**.

```
<HTML>
<HEAD>
<TITLE> Learning HTML</TITLE>
</HEAD>
<BODY>
<H1> My World</h1>
<HR color=Blue>
<HR color=Red>
<P>Hello! This is my first web page<br>
let us learn more about tags, attributes and values....</P>
<!--This is a comment-->
</body>
</html>
```

Setting Background Colour:

Background color sets the desired colour of the whole background of your webpage. To set background colour of the webpage type the tag `<Body>` with the attribute `BGCOLOR` as `<Body Bgcolor="colour name or code">`

For example: `<Body Bgcolour="Pink">`

```
1111 - Notepad
File Edit Format View Help
<HTML>
<HEAD>
<TITLE> Learning HTML</TITLE>
</HEAD>
<BODY bg color="pink">
<H1> My World</h1>
<hr color=RED>
<P>Hello!
let us learn more about tags, attributes and values....</P>
<!--This is a comment-->
</body>
</html>
```
